

Dear Parents/Guardians,

I wanted you to be aware we have been seeing an increase in covid at school. Please monitor your children for symptoms. Covid symptoms can be like other illness with runny nose (like allergy symptoms), body aches, sore throat, headache, cough, nasal congestion (like a sinus infection), fever, and loss of taste and smell. They don't always have a fever. Please keep your child at home if they are sick. If you have covid in your home, it is best to keep the person who tested positive away from others. If they have to be around others, then have them wear a mask. We do not quarantine students at school. Students who have been exposed to a positive family member are able to come to school if they are symptom free. If they become symptomatic then they stay home for 10 days. (day zero is start of symptoms and return on day 11 to school).

Thank you,

Nurse Julie

Please call me if you are questioning symptoms or keeping students home.
